Ft. Eustis Boulevard Extension
York County

Dear Mr. McReynolds:

This is in reference to your letter dated January 24, 2003, concerning the above noted project. The Virginia Department of Transportation supports the County's desire to redefine the project to extend between Route 17 and Route 634 (Old York-Hampton Highway). As a result, a revised environmental document will be required, which will result in either posting willingness or having a public hearing.

Therefore, I will be coordinating a meeting with the design team members to determine if the need for a revised environmental document and public involvement process will still allow us to meet the scheduled April 2004 advertisement date.

As always, we look forward to working with you on this project and should you have any questions, please give me a call.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven W. Hicks".

Steven W. Hicks
